(54) Title: A SPOOL PIECE TERMINATION STRUCTURE, A CONNECTION ARRANGEMENT COMPRISING SUCH A TERMINATION STRUCTURE AND A PIPELINE TERMINATION

(57) Abstract: The invention relates to a spool piece termination structure to be mounted to a spool piece so as to support a spool piece hub during the connection of the spool piece hub to a corresponding pipeline hub. The termination structure (5) comprises a clamping device (3) for clamping together said spool piece hub and pipeline hub, and a base frame (7) openly shaped downwards so as to allow the termination structure (5) to receive a pipeline end section provided with said pipeline hub by lowering the termination structure (5) downwards onto said pipeline end section. The invention also relates to a connection arrangement comprising such a spool piece termination structure (5) and a method for subsea connection of a pipeline to a spool piece.
